Subject: technical meeting

I nearly forgot about this...

at the working group meeting last Thursday, Jane Mitchell requested a smaller technical meeting (mainly the toxicologists) to discuss the details of the risk assessment . April 9 (next Monday) was the designated date....starting at noon.

first, are you available?

if not, I'll have to re-schedule - what are some alternate dates?

second, the group wants to discuss:

- (1) the adjustment of the vegetable data for the arsenic inorganic fraction. (they want to understand the Schoof paper)
- (2) The monte carlo analyses for the soil ingestion and vegetable ingestion pathways
- (3) the lead bioavailability study (they are reading this now....they may or may not have questions).
- (4) the adjustment of the vegetable ingestion rate to account for preparation loss

The meeting will be much shorter if we can provide them with the Schoof paper and the studies that you are using in the monte carlo discussion before the meeting. If you can get me copies, I'll get them out to all.

thanks
